WE BELIEVE EVERYONE CAN BUILD

A STRONG FUN BUSINESS

IN OVER **50**
COUNTRIES

INTRODUCING

Developed in 2005, Clip ‘n Climb is an extraordinary concept of fun climbing which guarantees unforgettable moments for all participants.

Clip ‘n Climb offers a selection of colourful climbing challenges suitable for everyone from the age of 2 to 102 years old, pushing their limits in a fun way.

The TRUBLUE® auto-belay system allows each person to climb independently without any previous experience. Have fun, play and watch your friends climb to the top!

Ever since the first Clip ‘n Climb facility opened in 2006, the concept is appealing to more and more investors each year. Currently, there are more than 380 facilities around the world!

OUR PRODUCTS

Every Challenge is an adventure. The unique designs invite participants to give them their best shot to reach the top.

Beyond the visual aspect, we also work on the tactile characteristics of our Challenges. Soft, rough, cold, each of them looks and feels different from their neighbouring Challenge.

The wide variety of hand and foot holds also enhances the importance that each climbing experience is unique.

Through commitment to innovation, our teams develop interactive challenges and enticing experiences to enrich the Clip 'n Climb experience.

TURNKEY SOLUTION

We provide you a complete turnkey offering with:

CHALLENGES • EQUIPMENT • WALLFLOORING • ENGINEERING INSTALLATION • SHIPPING • TRAINING

CAD SOFTWARE

THAT TRANSFORMS YOUR CENTRE INTO AN INTERACTIVE DESIGN

ANTI-MARKING TECHNOLOGY

Clip 'n Climb panel challenges are finished with a paint system that is 'EASY CLEAN'.

Regular cleaning with water and a sponge will remove the majority of unsightly marks from the panel surfaces, and when necessary the use of a mild cleaner will remove more stubborn marks.

HOW TO SELECT YOUR CHALLENGES

The selection of specific Challenges from within our wide range can be guided by a number of considerations.

IS THE BUILDING SUITABLE?

With 4 standard sizes, Clip 'n Climb Challenges adapt to any building height between 6,4 – 10,4 metres. For requirements that are greater or less than this range, a bespoke solution can be found for any building.

The Clip 'n Climb Design Department, that studies the feasibility of each project and models your building, can answer your questions in relation to available space and how it could be adapted if necessary.

HOW MANY CHALLENGES CAN FIT INTO MY BUILDING?

To answer this question, the Clip 'n Climb teams need to know your building's specifications and the proposed general layout of the other sectors that are in addition to the Clip 'n Climb arena. We support you through every step to optimise your facility's layout, while factoring in the visitor flow.

DO THE SELECTED CHALLENGES FIT MY ANTICIPATED VISITOR PROFILES?

Different facility locations and arrangements e.g. entertainment facilities, climbing gyms, stand alone Clip 'n Climb facilities or Clip 'n Climb zones within a larger space are likely to attract different visitor profiles. The difficulty levels can help select specific Challenges. It is advised that you discuss your needs and expectations in relation to the anticipated visitor profiles with your dedicated Clip 'n Climb Sales Consultants before you select your preferred range of Challenges.

ESSENTIALS

EVERYTHING YOU NEED TO RUN A SUCCESSFUL CENTRE

ASIDE FROM OUR FUN CLIMBING CHALLENGES, WE CAN ALSO PROVIDE YOU WITH THE SMALLER DETAILS TO GET YOUR CLIP 'N CLIMB CENTRE OFF THE GROUND.

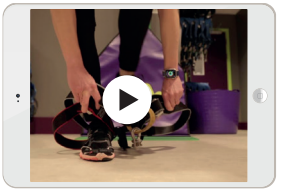

GUIDELINES

We offer guidelines including maintenance and operational duties, how to use the Clip 'n Climb brand correctly, and even recommendations for social media.

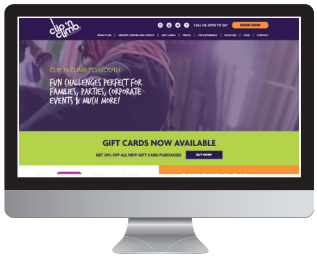

VIDEO BRIEFING

We have created a video tutorial to show to all participants before starting a Clip 'n Climb session.

Available in several languages and in short sequences, it covers the important considerations that we recommend be adopted in order to climb safely.

WEBSITE & EXTRANET

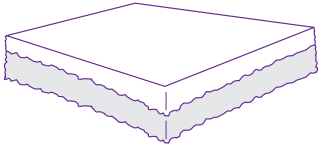

We have created an operational website and booking system for centre owners.

You will also have access to an extranet to share information with other owners and download marketing tools.

EQUIPMENT

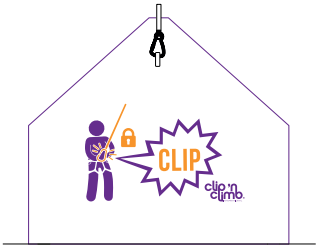

We provide you with all of the climbing equipment needed to operate your centre, such as harnesses, TRUBLUE auto belays, BelayMates, helmets, rescue kits, and more.

RUBBER CRUMB SAFETY SURFACE

Available in tiles or as a continuous wet poured surface.

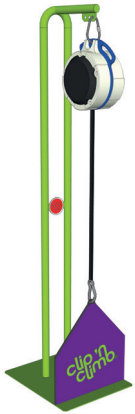

This is a critical part of our safety system and is an essential part of all centres.

ARTICULATED CLIP 'N CLIMB MATS

Every Challenge includes an articulated padded mat to which the webbing is attached.

Created to secure access to the Challenge, it signals its use and warns participants there is a climber above.

TRUBLUE® DEMONSTRATION UNIT

This is to demonstrate to climbers how to properly attach their harness to the TRUBLUE®.

Familiarisation of attachment techniques during the briefing period helps towards the smooth running of a Clip 'n Climb session.
